

RFIDENTIKIT 2023

Event Management & Accreditation Solutions

Presented by RFIDentikit

About Us

RFIDentikit has offered world-class access control, data capture and event-based tracking solutions since 2012.

During this time, RFIDentikit has provided bespoke solutions to international clients on all five continents. Events have ranged from corporate events, to elite-level sporting tournaments and music events with hundreds of thousands of attendees.

Worldwide Client Base

Single System, Unlimited Solutions

AllowME offers a full turnkey solution for all event management needs. This includes:

- Providing a custom-built, brand-focused, mobile-friendly portal to collect attendee data
- Building a bespoke back-end 'instance' where event staff can review, approve and reject applications, as well as contacting attendees
- Building a bespoke middle-end UI for custom workflows
- Access control security consultation
- Supply of trained accreditation staff
- Live and post-event presentation of data for future event planning

Accreditation Management

How it Works

- An event site is configured. Different pass types can be designed to allow for access in different areas and different dates / times
- Attendees are directed to a portal, where they can find event details and apply for their pass as well as access other services
- Pass applications are reviewed and approved or rejected – users can be informed of this decision automatically
- The event team print the custom-designed passes and assign a unique ID that is specifically linked to the attendee
- Attendees collect approved passes
- Attendees' access is now controllable and traceable

Bespoke Portals

- We can build one or multiple mobile-friendly, client-facing web apps bespoke to your customer's brand. Entirely separate accreditation journeys can be created for talent, staff and media.
- Portals can be used to collect useful, meaningful data on any scale, whether for pass requests or other purposes.

Custom Data Collection

- User Information
- Photo ID
- Contact Details
- Next of Kin
- Radio Requests
- Stringing Information
- Signed Document Uploads
- ...Truly any information

Data Presentation

- Site Information
- Covid Regulations
- On-site Rules
- Health and Safety Documentation
- Catering Schedule

Powerful API Integration

- Customisable API engine
- Can be custom-built to serve a specific purpose
- Can send or receive any data
- Seamlessly incorporate your systems into our platform

Dynamic Passes

Event-specific, custom-designed passes that can be altered to display any information or access type. Our passes can display absolutely any information that can conceivably be held against a person on the system: name, photo, dates, zones, organisation, job role, access groups.

- Blank canvas pass design engine; on one or both sides
- Field transformations (e.g. attendees with a car on their pass have courtesy car access)
- Printer rental

Catering Management

- Records every meal that an individual consumes throughout their period onsite.
- Assign catering requirements per meal, per day or per organisation
- Track and manage dietary and allergy needs
- Attendees can be assigned timed catering slots ensuring they only eat at the right place at the right time
- Live dashboards and expected meal numbers can be given to catering staff
- Instant yes-or-no feedback on any scale
- Cost-saving on catering through providing precise data, rather than relying on estimates or plate counts

RFIDENTIKIT

Bespoke, Adaptable Solutions

In addition to our accreditation and tracking services, we can use our technology to provide a wide range of solutions specific to your customer's event. Our strength is our adaptability; if there's something specific in mind, it's likely that we can accommodate. We can take on the management of...

Stringing services

Hotel room booking

Transport requests

Volunteer scheduling

Uniform ordering

Practice court
booking

We can provision for the entire accreditation journey not only for staff, media and riders, but any relevant persons such as volunteers and VIPs.

Live Data

Live data dashboards enables your event control teams to get scanning statistics from all equipment on-site.

- Total Unique people on-site
- Highest performing scanner locations
- Hourly/Per minute flow rate
- Total and total unique scans per zone
- Total and total unique scans per pass type/ticket type.

Data can be exported or transferred to a 3rd party such an event control solution through an API.

Powerful Data Reports

Post-event data packs can provide a wide array of data for detailed, evidence-based future planning.

Incisive data allows for a safer, more secure, more cost-effective event next time round.

- Data packs can be generic, containing the essential data you need at reduced cost or bespoke, giving a deeper, more in-depth insight and analysis on accreditation and security.
- Can display peak dates and times of people traffic to and from site
- Gives an insight into which access points are especially busy or quiet; allows for better allocation of security resources
- Can be used for commercial and analytical purposes, assessing popular locations and peak demand times
- Useful for cost-cutting; access data gives an insight into what you need for next time – and what you don't

Dedicated Staff Portal

The Staff Portal is a dedicated experience for your staff that provides a centralised hub connecting them to your event services.

Accreditation – User management & Process

- Multiple user journeys. i.e Media or Suppliers, will see different information, menus, and forms throughout the process
- Portals can be translated into other languages
- GDPR consent agreements implemented throughout
- Personal details, documents and photos can be collected, and questions can differ for different groups
- Forms can be created to include multiple choice, tickboxes and drop-down menus
- Organisation Admins and Player managers can apply for groups of people at a time

Accreditation – Pass Printing

- Printing is made light work by use of these key features:
 - Merged content in design, no formatting required
 - Batch printing
 - Printing by access group, organization, zones or dates
 - Quick preview of what will print and instant photo editing
 - Able to print to any printer so you're not tied down to one format or size

Booking

- Book facilities and training spaces
- View booking information on live screens
- Easily manage booking requests and send information packs
- Attendees can receive booking confirmation and a welcome pack when their slot is accepted
- Booking tool can be adapted for many purposes such as:
 - Volunteer shift scheduling
 - Logistic management
 - Delivery scheduling

Parking Management

- Request staff parking on the portal
- Validity dates and parking zone can be changed without re-printing the pass
- See how busy a car park is over time
- Barcode/QR Code/RFID sticker can be added for extra security and integrity
- Parking passes can be emailed to individuals on approval to be printed at home
- Alerts can be sent to individuals if their pass is about to expire

PARKING PERMIT

ENSURE THIS PERMIT IS PLACED IN YOUR WINDSCREEN AND CLEARLY VISIBLE AT ALL TIMES WHILST PARKED IN THE PREMISES

Hotel Booking

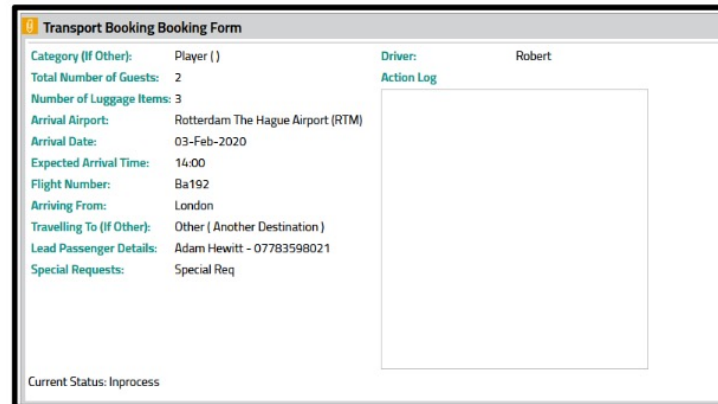

- Permitted attendees are able to view available rooms and make a booking
- Different hotels and room types can be made available to different groups such as Players and Media
- Booking grids can be configured to show live availability in real time
- Information required by organisers to secure the booking can be collected on the portal
- Changes can be made after booking and then reviewed and accepted by organisers

Transport Management

Assigning people/drivers

Booking form

- Dedicated transport booking system that allows contractors and players to request transport to and from the venue and airport
- Drivers can be assigned, and a schedule can be produced
- Driver shifts can be selected and managed through AllowME so you can ensure there is always a driver available
- The records can be updated as soon as the journey has started and be closed when they are complete
- See immediately all the journeys taking place across the week to help group similar journeys together

Logistics Management

- All vehicles' details and license plates can be stored in AllowME and logged against a driver or organisation
- Vehicle passes can be scanned and verified against the driver to ensure both are allowed on site
- Transport can be managed on the same screen as Visa, flights, hotel and laundry services ensuring everything lines up
- Daily or weekly custom reports can be generated to show daily site activity
- Deliveries can be scheduled, and reports generated to see

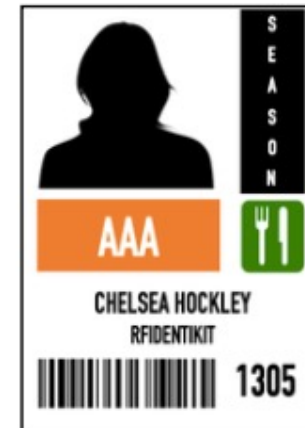

#	Record Type	Status	Attached To	Headlines	With Selected

Media Management

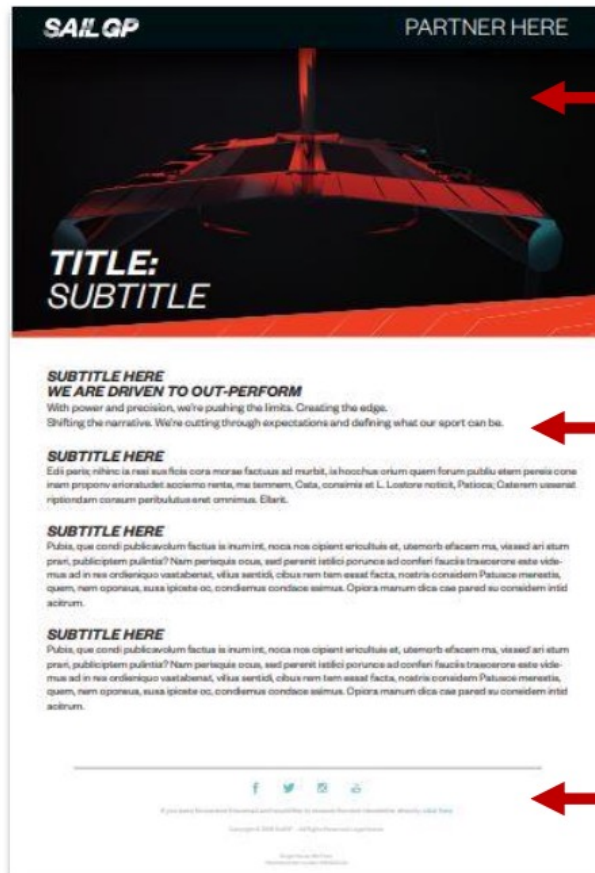

Dedicated Media Accreditation

- Completely customisable application journey for media
- Easily collect additional information such as:
 - Network requirements
 - Bringing broadcast truck
 - Size of reach
 - Publication type
- Control access to sensitive areas with clearly visible media passes
- Restrict approval rights to media team, keeping applications separate to standard accreditation

- Media will receive specific:
- Dates/Access times
 - Classifications/Access levels
 - Match/Event/Day #/other info

Press & Media Accreditation - Newsletter

Layout can look however the Porsche team would like, with correct branding and positioning.

Structure and content is completely customisable for Porsche.

The number of newsletters is also unlimited.

Correct social media links or other embedded links if this interests the Porsche team

- Easily create newsletters addressed to different media groups
- Using AllowME's people list engine we can easily distribute timed emails based on a template to specific groups
- Links on the newsletters can be used to collect additional information on the media portal
- Recipients can opt-out of receiving communications fitting inline with GDPR guidelines

Secure Access Control

RFIDentikit Family of Scanners

- We have a range of scanners available; each has different benefits:
 - Long Range: Its strength lies in scanning both far (up to 10m) and in large quantities, quickly
 - Handheld: Its strength lies in individual scanning which encourages more security interaction and a tighter control
 - Tap stations: Its strength lies in a self-service element with no accidental scanning, such as collection of food/deliveries.
- Various mounting options available for portable, pop-up and long-term installation. We've installed antennas in a multitude of different locations and individual setups, adjusting to the particular event space as required

Safe, Secure, Traceable

Our system empowers security forces (or stewards/volunteers) to be able to fulfil the security function to a higher standard. Photo-displaying, person-linked results on scanners make pass forgery or pass swapping impossible.

- Long or short range, contactless RFID scanning
- Stationary or handheld scanners
- Live dashboard allows for real-time access monitoring
- Attendee's name, photo and information displayed on pass
- Allowed / not allowed message displayed, with reasoning
- Impossible to talk your way into an area; you're either on the system as allowed or not
- Access can be updated in real time
- Digitally encoded to a person – cannot be duplicated
- Removes confrontation between security and attendees
- RFIDentikit can consult on access security

Live Access Control

- Our technology provides comprehensive access control and security monitoring site-wide, from a single screen.
- Our system provides live updates on access events across the site
- Any attendee's location can be tracked at any time
- Dashboard allows for real-time access monitoring
- Live security and monitoring of all attendees
- Working with security to restrict access in real time where required, anywhere on site

‘I’ve kept my [RFIDentikit] pass on because this is the most secure festival in the world’.

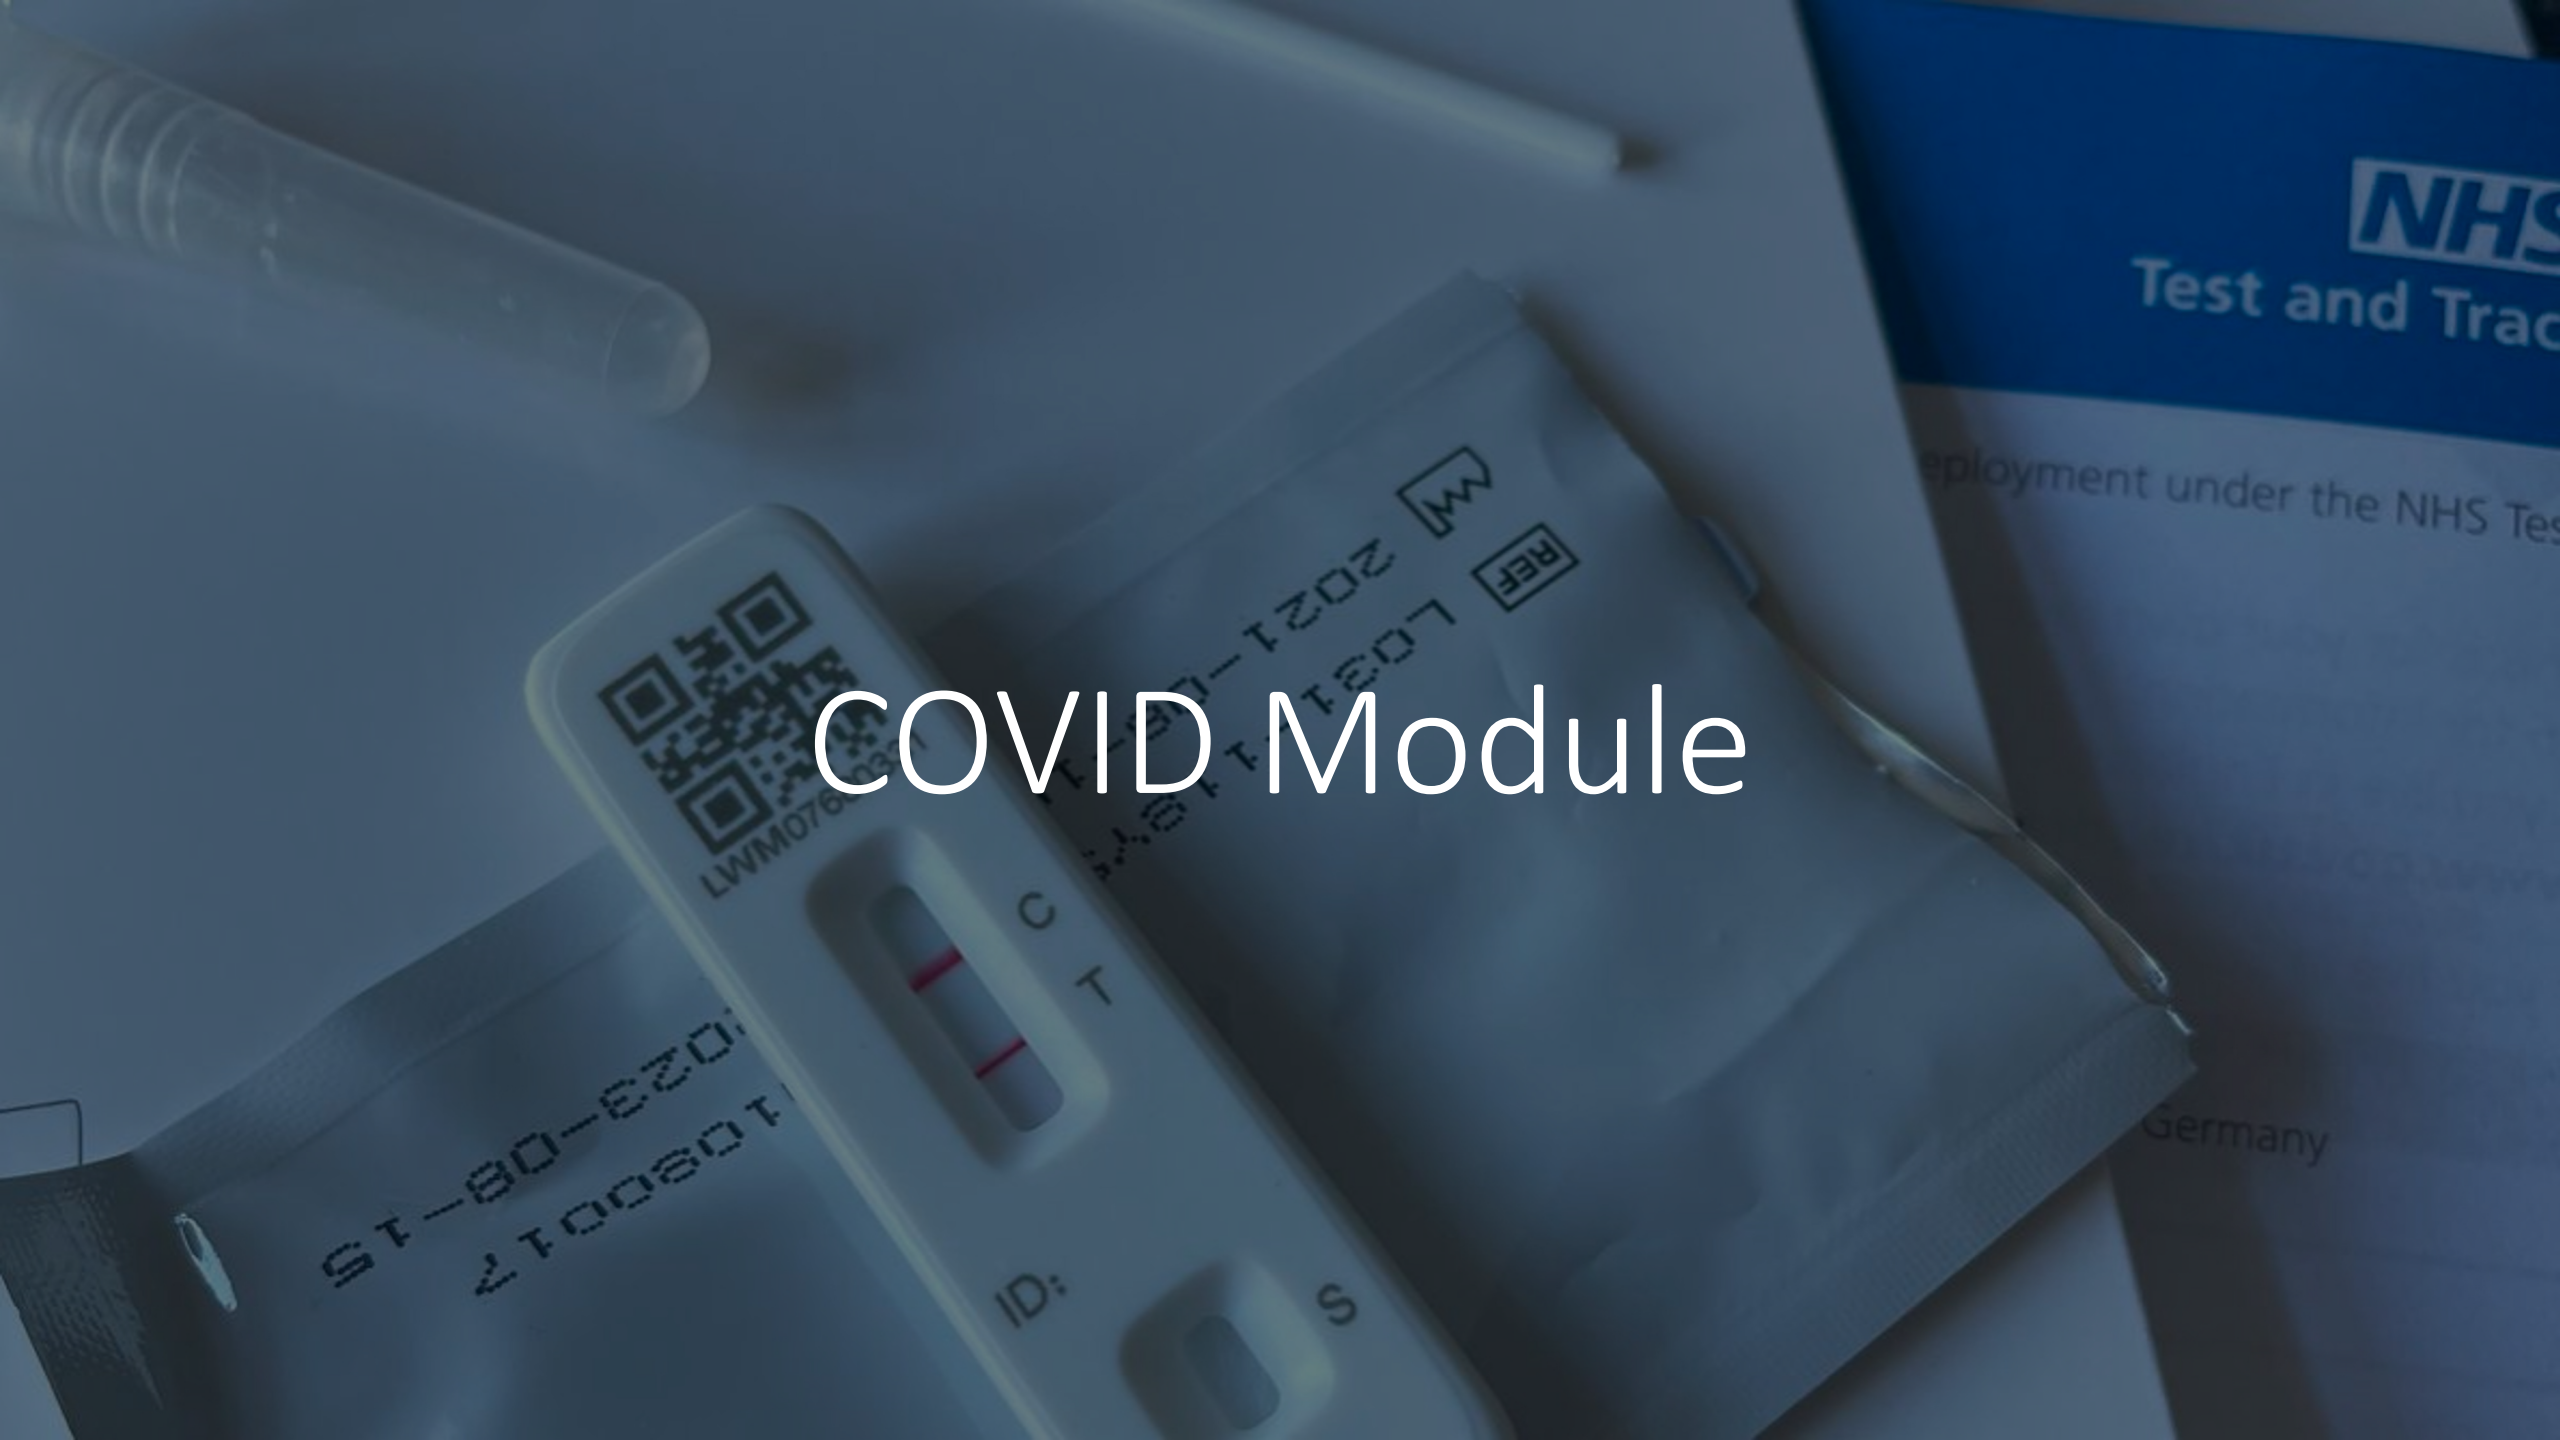

– Ryan Tedder, OneRepublic

Project Management

- At the **Start of your project**, you will be assigned a dedicated project manager who will work with you to set deadlines and deliver the work.
- Project managers are assisted by project technicians who will build your instance and portal to your specification.
- **Prior to your event**, your project manager and technician will come to site to train your team and setup your scanners and equipment.
- **Throughout the event** your on-site support will become part of your team helping you get the most out of your software and hardware, assisting with reports, printer maintenance and complex data tasks.

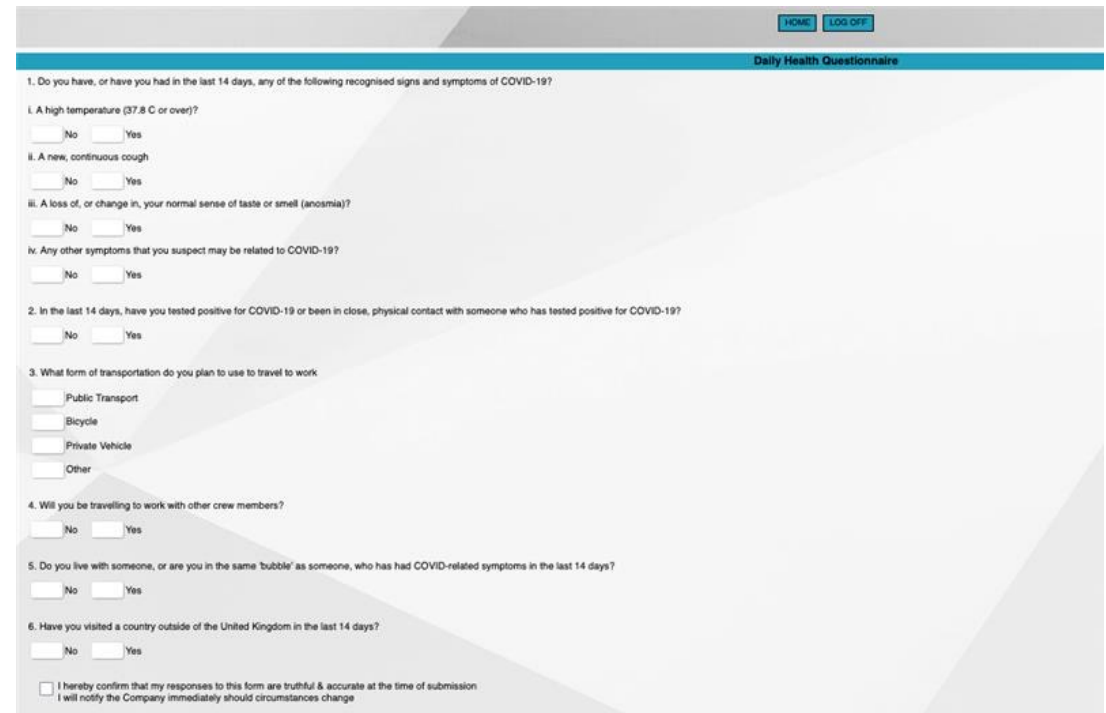

COVID Module

COVID - Requirements

- RFIDentikit has provided COVID management and testing solutions to over 30 clients since March 2020
- Our contact tracing function in our RFID scanners will report all movement in the venue with the ability to quickly inform close contacts of a positive case
- Secure the site with a daily health questionnaire that is sent in the morning
- Powerful automation and alerts are triggered if an individual becomes positive or reports symptoms
- The site can be divided up with different vaccination, testing or compliance requirements creating safe spaces for players and essential support staff

HOME LOG OFF

Daily Health Questionnaire

1. Do you have, or have you had in the last 14 days, any of the following recognised signs and symptoms of COVID-19?

i. A high temperature (37.8 C or over)?
 No Yes

ii. A new, continuous cough
 No Yes

iii. A loss of, or change in, your normal sense of taste or smell (anosmia)?
 No Yes

iv. Any other symptoms that you suspect may be related to COVID-19?
 No Yes

2. In the last 14 days, have you tested positive for COVID-19 or been in close, physical contact with someone who has tested positive for COVID-19?
 No Yes

3. What form of transportation do you plan to use to travel to work?
 Public Transport
 Bicycle
 Private Vehicle
 Other

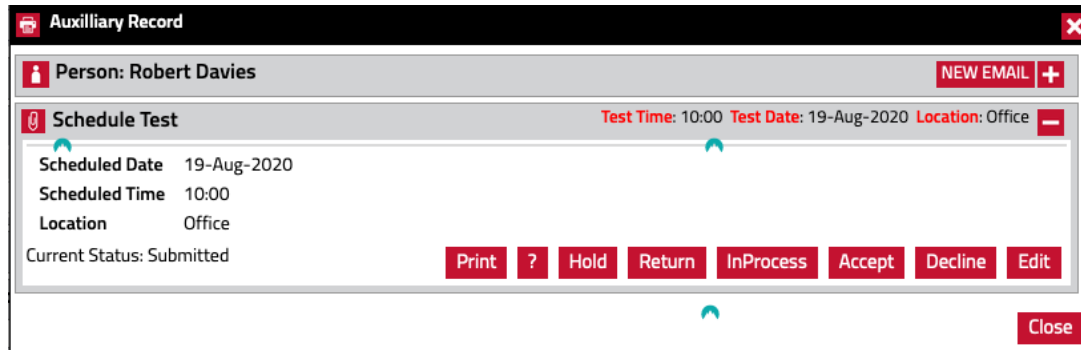

4. Will you be travelling to work with other crew members?
 No Yes

5. Do you live with someone, or are you in the same 'bubble' as someone, who has had COVID-related symptoms in the last 14 days?
 No Yes

6. Have you visited a country outside of the United Kingdom in the last 14 days?
 No Yes

I hereby confirm that my responses to this form are truthful & accurate at the time of submission
I will notify the Company immediately should circumstances change

- Custom built; secure, RESTful APIs can be setup with testing providers
- Access can be revoked, and medical staff can be informed in the case of a positive or inconclusive
- Self-administered rapid antigen tests can be uploaded to the portal for review.
- Testing regimes and cadences can be configured per group, organisation or access type

HealthCRED & MediVIEW

HealthCRED

- Showing status of all health tests and conditions for all players, guests, media and contractors.
- Allows tracking of the necessary steps required for each person to be on site, as well as control access of their pass dependent upon their health status

My Health Status

	Last Result	Date Updated	Status	
1	Pre-travel Test			
2	COVID-19 Test	Booked	30 Jun 2020

Scanner Integration

- Flagging system – with any positives automatically placing accreditation status to **AMBER**
- Attendees COVID status can easily be seen on scanners allowing security to deny entry based on the following:
 - Not filling out or failing a daily health questionnaire
 - Not agreeing to a certain COVID policy or agreement
 - Not achieving a certain vaccine status
 - Having COVID in the last 90 days
 - Currently COVID positive
 - Flagged as a close contact of a positive or symptomatic case
